HB Support 1 year free with Jump Start - email / phone support

House Training Quick Start Guide

Follow these instructions regardless of your dog's age.

- ✓ Get a clean bill-of-health from your veterinarian.
- ✓ The dog must be confined or constantly supervised at all times while inside.
- ✓ If you will be gone for periods longer than the dog can wait, set up a confinement area (or larger crate) with a bathroom. Read the Confinement Training Section in Pup Start I for instructions.
- ✓ Methodically introduce your dog to the crate and the concept of alone time.
- ✓ When you are inside and your pup is not crated or confined, use a tether to keep your pup nearby.
- ✓ Never provide your dog with opportunities to soil your house.
- ✓ Always provide your dog with adequate access to use a specific potty area.
- ✓ Place all meals on a regular schedule.
- ✓ Keep a log of feeding and elimination.
- ✓ Go out with your dog and lead him to the area.
- ✓ Teach your dog to defecate and urinate on command.
- ✓ Teach your dog that any rewards are for eliminating outside.
- ✓ Pay your dog for eliminating outside.
- ✓ Teach your dog to ring a bell.
- ✓ Never scold or punish your dog for any potty accidents.
- ✓ Clean soiled, inside areas with cleaners containing enzymes.
- ✓ When your dog becomes more reliable, gradually grant him supervised access to more and more areas of your home.
